Installation Tools

 
Car plastic pry plate x 2

InstallationNotes

Pay attention to protecting the appearance of the central control; turn off the key switch and do not install with power on.

Installation steps

01

Remove the cover behind the original car's central control display screen; they are all snap-on

02

Use the rocker to remove the upper cover behind the steering wheel

03

Use the rocker to remove the rear panel of the steering wheel

04

Use the rocker to remove the panel where the instrument is installed

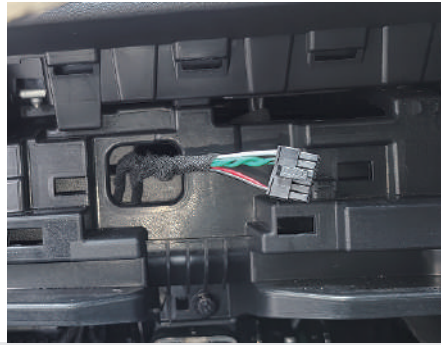

05

Unplug the wire of the original headlight height adjustment switch

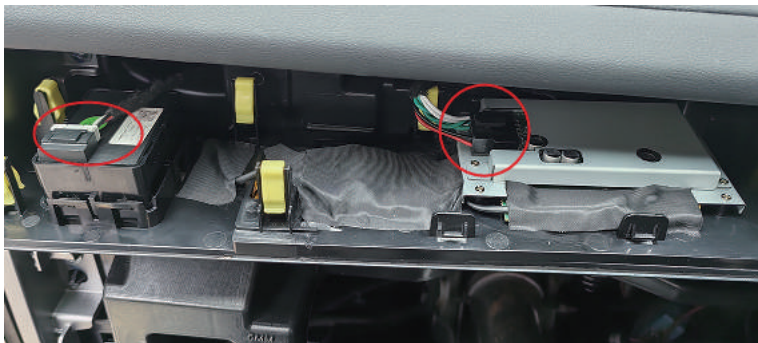

06

Remove the decorative panel clips at the instrument installation position and install them in the corresponding position behind the instrument screen.

07

Plug the power cord into the original car plug and put the instrument line behind the screen.

08

Instrument screen, headlight height adjustment switch wiring

09

Put the instrument screen on

10

Install the steering wheel rear cover and panel

11

Install the panel below the steering wheel
